SUMMARY

Software Engineer (New Grad) with production experience building full-stack platforms (Next.js, Node.js, MongoDB, AWS) for startups and public-sector clients. Proven ability to ship features end-to-end, automate deployments (CI/CD, TDD), and scale systems under tight deadlines to meet customer needs.

EXPERIENCE

Freelance Developer, Self-Employed - Remote **Mar 2024 – Present**

- Delivered custom solutions for 3+ startups, including a full-stack vendor portal (RBAC, contract workflows, file sharing) and two website redesigns.
- Rebuilt CS Labs' website using **Next.js** and modern UI & UX design, improving performance and engagement.
- Developed a management dashboard for Jackson Development Co., automating contract/employee processes and reducing admin work by **~40%**.
- Set up GitHub Actions CI/CD pipelines, reducing deployment time by **~35%**.

Software Developer (Contract), Necx - Remote **Feb 2024 – Apr 2025**

- Built a real-time chat & document tracking platform for **50+** law enforcement agencies using **Node.js** & **PostgreSQL**.
- Owned features end-to-end under tight timelines with **Test Driven Development (TDD)** and modular **APIs**.
- Defined architecture and onboarding patterns that sped up new agency integrations by ~**30%**.

Software Engineering Intern, Amazon - Seattle, WA (Onsite) **May 2023 – Aug 2023**

- Built the "Video Card" feature to be seen by **~5M** monthly users, integrating it into Amazon Photos' distributed mobile app using **React Native**, **Java**, and **Swift**.
- Contributed clean, production-level code in a massive codebase, collaborating across backend and mobile teams.
- Participated in design reviews and agile sprint ceremonies, improving technical judgment and delivery speed at scale.

PROJECTS

Receipt Parsing App **Feb 2025 – Aug 2025 (part-time)**

- Building a mobile platform to scan and parse receipt data for seamless bill-splitting among groups.
- Uses **OCR**, **Firebase cloud functions**, and collaborative UX patterns to streamline expense management.

Online Multiplayer Game Platform (https://family-gr-client.vercel.app) **May 2025 – July 2025 (side project)**

- Developed a modular game engine with plugin support for real-time games like Spades and Dominoes.
- Designed full-stack architecture with plugin-based game logic using TypeScript, WebSockets, and events.

EDUCATION

Bachelor of Science, Computer Science, George Mason University **Aug 2020 – May 2024**

- Relevant Coursework: Software Testing, Computer Vision, Data Mining, Secure Programming

TECHNICAL SKILLS

Languages: TypeScript, JavaScript, Python, Java, SQL, C
Frameworks & Tools: React, Redux, Next.js, Express.js, Node.js, Tailwind CSS
Systems & Infrastructure: AWS (Lambda, S3, EC2, ECS), Docker, Redis, WebSockets, Firebase
Storage & Data: PostgreSQL, MongoDB, REST APIs, JSON, GitHub, CI/CD
Development Practices: Agile, Scrum, TDD, OOP, Modular Design, Clean Code

Certifications

- **AWS Certified Cloud Practitioner** **2025**
